Harshad Agrawal

Pune, MH | +91 7622871384 | harshad.agrawal2005@gmail.com | LinkedIn |GitHub | Portfolio

Summary

AI/ML engineering student with hands-on experience building machine learning models, LLM-based systems, and backend AI pipelines using Python and FastAPI. Experienced in data processing, model evaluation, and deploying ML inference workflows for real-world applications. Passionate about generative AI, scalable AI systems, and intelligent automation.

Work Experience

AI Engineer Intern | Akiyam Solutions | Dec 2025 – Present

- Built and maintained FastAPI-based backend services supporting internal AI tools and ML workflows.
- Processed and analyzed structured datasets to support AI-driven decision systems.
- Conducted data validation and performance evaluation to improve model accuracy and consistency.
- Implemented end-to-end model inference pipelines for rapid prototyping of machine learning features.
- Integrated frontend interfaces with backend APIs to enable seamless data and model interactions.
- Collaborated with cross-functional teams to test, debug, and improve system reliability.
- Analyzed datasets using Python and Pandas to identify trends and optimize system performance.

Education

Symbiosis Institute of Technology, Pune 2024 – Present

B.Tech in Artificial Intelligence and Machine Learning

Projects

MindMetrics — Mental Health Data Analysis | Github

- Cleaned and analyzed structured datasets to develop scoring models for mental health assessment.
- Processed and analyzed structured datasets using Pandas and Scikit-learn.
- Built reusable pipelines for feature engineering and statistical evaluation.

Tech: Python, Pandas, Scikit-learn

Exoplanet Classifier – NASA Space Apps Challenge | Github

- Built machine learning models to classify potential exoplanets using TESS and K2 datasets.
- Cleaned and preprocessed large astronomical datasets, performed feature extraction, and evaluated model performance using statistical metrics.
- Contributed to team-based problem-solving under time constraints.

Tech: Python, Machine Learning, Scikit-learn

Technical Skills

Programming: Python, R, C
Machine Learning: Supervised Learning, Unsupervised Learning, Feature Engineering, Model Evaluation, Data Preprocessing
ML Frameworks: Scikit-learn, TensorFlow,
Generative AI & LLMs: Large Language Models (LLMs), Prompt Engineering, Agentic AI, Retrieval-Augmented Generation (RAG)
Data Processing & Analysis: Pandas, NumPy, Exploratory Data Analysis (EDA), Data Cleaning , Matplotlib
Backend & AI APIs: FastAPI, Flask, REST API Development, ML Inference Pipelines
Databases: MySQL, MongoDB, Neo4j
Developer Tools: Git, GitHub, VS Code, Jupyter Notebook
Cloud: Oracle Cloud Infrastructure (OCI)

Awards, Honors and Certifications

- **Oracle Cloud Infrastructure 2025 —** Multicloud Architect Professional | View
- **Oracle Cloud Infrastructure 2025** — Foundations Associate | View
- **Neo4j Graph Data Science Certification —** Neo4j | View

- **Full-Stack Generative & Agentic AI with Python —** Udemy | View
- **Generative AI Exchange Hackathon 2025 —** Google Cloud / Hack2Skill | View
- **SQL (Advanced) —** HackerRank | View
